Sr. Web Engineer – Nike.com Web - Consumer Digital Technology
Nike is looking for a Senior Web Engineer to join our team of engineers developing and deploying cloud-based e-commerce applications for Nike.com.

The ideal candidate is:

- Passionate about the latest web development methodologies and tools;
- Experienced with Agile software development practices;
- Motivated to drive processes and practices that result in high-quality software;
- Comfortable with ambiguity and successful in fast-paced, complex work environments.

NIKE, Inc. does more than outfit the world's best athletes. It is a place to explore potential, obliterate boundaries and push out the edges of what can be. The company looks for people who can grow, think, dream and create. Its culture thrives by embracing diversity and rewarding imagination. The brand seeks achievers, leaders and visionaries. At Nike, it's about each person bringing skills and passion to a challenging and constantly evolving game.

Responsibilities
- Design, develop, test, deploy, maintain and improve cloud-based web applications for Nike.com.
- Work within an Agile software development team as a strong collaborator with a focus on continuous improvement.
- Peer review technical designs, code and tests to keep the entire team focused on being the best they can be.
- Harness your inner DevOps skills to automate your application deployments so they're fully repeatable. (Experience using Webpack / Node / AWS is a plus.)
- Performance tune your work to ensure we deliver the fastest web experience to all consumers across the globe.
- Partner with architects and distributed teams to ensure Nike.com applications stay loosely coupled and independently scalable.
- Automate testing of all of your components to ensure we have excellent test coverage with quality assertions.

Qualifications

Minimum qualifications:
- BS degree in Computer Science, similar technical field of study, or 2 years equivalent professional experience
- 4 years of professional software development experience
- Experience with front end technologies including: HTML, CSS, JavaScript (ES2105)

Preferred qualifications:

- Demonstrated experience shipping code in Agile software teams
- Excellent analytical, written and spoken communication skills
- Experience writing automated tests using tools like Karma, Mocha, Chai or Nightwatch
- Experience with applications hosted in Amazon Web Services AWS (preferred)
- Experience working with RESTful APIs (preferred)
- Experience working with ES6 (highly desired)
- Experience working with highly concurrent systems (highly desired)
- Experience with React, Backbone, Angular and other web frameworks (preferred)
- Strong working knowledge of basic computer science data structures and algorithms

Interested?

Does this feel like the right position for you? Great, we offer a casual work environment, a diverse and inclusive culture, and a host of other perks we don't have room to mention here.

We're interested in learning more about you. We appreciate you taking the time to apply.
